

Testing sample questions

1. I am weak in Algebra. What should I do next?

The screenshot displays the Vedantu Study Assistant interface. On the left, a sidebar shows the user's profile (Arjun, ID: 5123, Grade 10, CBSE, 90 min/day) and a list of weak topics including Algebra, Quadratic Equations, and Light - Reflection and Refraction. The main chat area shows a message from the user: "I am weak in Algebra. What should I do next?". The assistant's response is as follows:

Arjun, it's great that you're focusing on improving your Algebra skills! Here's what you should do next:

Urgent: You have a Math Weekly Test in just 5 days (on 2026-06-04) covering Algebra and Quadratic Equations. Let's prioritize these topics.

Recommended Study Plan for the Next 5 Days (90 minutes daily):

- Focus Areas:**
 - Algebra (including Quadratic Equations, since both are weak areas and part of your upcoming test).
- Study Material:**
 - Day 1-2: Spend 45 minutes each day on "Algebra Basics Revision Notes" (Material ID: M101) to strengthen your fundamentals.
 - Day 3-4: Spend 45 minutes each day on "Quadratic Equations Concept Video" (Material ID: M103) to clarify concepts and problem-solving techniques.
 - Day 5: Review both materials and attempt practice questions from your textbook or class assignments for 90 minutes.
- Daily Split:**
 - 45 minutes: Algebra Basics Revision Notes
 - 45 minutes: Quadratic Equations Concept Video

Tips:

- Focus on understanding the steps in solving equations, not just memorizing.
- Note down any doubts and clarify them with your teacher or classmates.
- Practice at least 5-10 problems daily from each topic after reviewing the material.

You're on the right track, and with focused effort this week, you can boost your confidence in Algebra before the test. Keep going—you've got this!

At the bottom, there is a text input field labeled "Ask your study assistant..." and a send button.

VEDANTU ASSISTANT

Here's your personalized study plan for this week, Arjun!

You have an urgent Math Weekly Test on 4th June (in 5 days), covering Algebra and Quadratic Equations. Both are also your current weak areas, so let's focus on them first. You also have "Light - Reflection and Refraction" as a weak topic, but since it's not in an upcoming test, we'll give it less priority.

Here's how you should split your daily 90 minutes:

- Quadratic Equations (35 minutes)
 - Watch: Quadratic Equations Concept Video
 - Practice problems from your textbook or class notes.
- Algebra (35 minutes)
 - Read: Algebra Basics Revision Notes
 - Solve sample questions and review any mistakes.
- Light - Reflection and Refraction (20 minutes)
 - Watch: Ray Diagrams Explained
 - Review your class notes and make a summary sheet.

Tips:

- Focus most on Algebra and Quadratic Equations until your Math Weekly Test is over.
- After the test, you can shift more time to "Light - Reflection and Refraction."
- Don't hesitate to ask if you want practice questions or help with any topic!

You're on the right track—just keep practicing and reviewing your weak spots. Good luck for your upcoming...

VEDANTU ASSISTANT

Arjun, you should prioritize Quadratic Equations and Algebra first. Both topics are your current weak areas and are included in the upcoming Math Weekly Test on 4th June—just 5 days away, so this is urgent.

Here's how you can split your 90-minute study session today:

- Quadratic Equations: 45 minutes
- Algebra: 45 minutes

Focus on these two topics until the test. Once the test is done, you can shift more attention to "Light - Reflection and Refraction," which is not in the immediate test.

You're making smart choices by asking about priorities—keep it up! If you need specific resources or practice questions for these topics, let me know.

VEDANTU ASSISTANT

Arjun, your "Math Weekly Test" is in 5 days (on 2026-06-04), covering Algebra and Quadratic Equations. Since this test is urgent and both topics are currently weak areas for you, let's focus your 90-minute daily study time efficiently.

Here's your actionable study plan for the next 5 days:

1. Quadratic Equations (45 minutes/day)
 - Start with "Quadratic Equations Concept Video" to build your understanding.
 - Practice solving 5-6 problems from your textbook or class notes after watching the video.
2. Algebra (45 minutes/day)
 - Revise using "Algebra Basics Revision Notes."
 - Try to solve sample questions or previous test problems related to Algebra.

Tips:

- Alternate between topics each day to keep things fresh.
- On the last day before the test, do a quick recap of both using the materials above and attempt a mock test or sample paper if available.

You're focusing on your weak areas, which is the best way to improve quickly. Let me know if you want practice questions or more resources for either topic. You've got this—keep up the hard work!

5. What are my weak areas?

YOU

What are my weak areas?

- Fetching weak topics...

VEDANTU ASSISTANT

Arjun, here are your current weak areas based on your recent performance:

1. Mathematics
 - Algebra (Score: 52%)
 - Quadratic Equations (Score: 52%)
2. Science
 - Light – Reflection and Refraction (Score: 63%)

These topics would benefit from extra practice and revision. Since you have 90 minutes daily for study, I recommend splitting your time as follows for the next few days:

- 35 minutes: Algebra & Quadratic Equations (alternate days or combine if you prefer)
- 35 minutes: Light – Reflection and Refraction
- 20 minutes: Revision of strong topics or practice questions

Focusing on these areas will help strengthen your overall performance. Keep up the good work, and let me know if you need specific practice material or tips for any of these topics!

YOU
